Message from the Rector

Dear Contemporaries!

The world is becoming increasingly complicated now a days and it requires an individual to possess high level of education and skills.

Now a days kyrgyzstan takes the leading part in the area of education among Central Asian Republics. Osh State University being a leader of higher education in the southern kyrgyzstan meets the new challenges of the time.

Osh State University has sufficient innovative potential for effective introduction of new teaching technology into academic process. To integrate the world educational community, Osh State University develops international cooperation with more than 30 educational and research institutions abroad. University is a participant of various international programmes.

Numerous employees of our university are ready to serve you providing with our immense intellectual and material resources. We welcome everybody who seek for developing the potential of a free individual with democratic values.

H.E Mr. Kudaiberdi Kozhobekov
Rector Osh State University

Osh State University

Osh State University is the leading Educational, Cultural and Scientific Research center of the Kyrgyz Republic. According to IREG approved IAAR Eurasian International University Rankings 2021 - Osh State University is ranked first in Kyrgyzstan, Top -5 in Central Asia, Top-10 in Eastern Europe, Central Asia and Eurasian Region. Rankings are issued annually by IAAR which is a WFME and EQAR recognised accreditation agency Osh State University is Member of World Association of Universities and Colleges (WAUC), Association of European Universities (EUA), East European Universities Association. European Association for International Education (EAIE), Global Alliance for Transnational Education (GATE), Federation of the Universities of the Islamic World (FUIW), International Association of Universities under UNESCO.

International Medical Faculty

Medical faculty, Osh State University has been training foreign students since 1993. During the years of its existence Medical faculty, Osh State University has trained foreign students from more than twenty countries. Students are studying at International Medical faculty from countries like India, Pakistan, Nepal, Bangladesh, Turkey, United States, United Kingdom and others.

Medical Faculty OshSU is recognized / listed with:

International Medical Faculty is recognised by:

Ministry of education and science

Ministry of Public health

Independent Agency for Accreditation and Rating

World Directory of medical schools

US Residency Pathway 3

International Medical Faculty
OshSU is a world-class leader in medical education, research, and patient care. As a student here, you'll receive a dynamic education with real-world experience that will empower you to succeed in today's competitive medical field.

Campus

Campus of International Medical Faculty is located in South-Eastern part of the city, It is surrounded by beautiful mountains and Ak-buura river passes through the campus. International Medical Faculty OshSU has got a state of the art newly purpose built campus with Classrooms, Lecture theatres, Laboratories, Museums, Dissections halls and library. Basic medical sciences departments are located in Educational campus of the faculty while Clinical Sciences departments in hospitals and clinics.

Our campus empowers faculty, students and staff to take full advantage of the opportunities through state-of-the-art facilities and beautiful designed spaces.

Our Educational campus is primary hub for our educational activities. In addition to flexible learning spaces, campus houses conference facilities, a student lounge and the most comprehensive health-care simulation training facility in the region.

Comprehensive study is promoted to students by providing them with contemporary lecture halls enhanced with audio/visual technology, fully equipped library and computer center. A convenient cafeteria is available as well as numerous common areas available for study and relaxation. The complex has a beautiful landscaping. All buildings are equipped with a high speed wired and wireless internet connection, while external structures are accommodated with breezeways.

Affiliated Hospitals

When it comes to clinical experience, International Medical faculty OshSU offers students unparalleled variety in which to learn. It is affiliated with Government sector hospitals of Osh city - all within a fifteen-minute drive of the Faculty campus - that serve not only more than a million people of Osh Oblast but 2.5 million people of the whole Southern Kyrgyzstan, of diverse backgrounds and socioeconomic status. At International Medical Faculty OshSU, the road to becoming a physician takes students to these hospitals. These hospitals provide a range of diverse training opportunities for medical students and residents.

At International Medical Faculty OshSU, we provide students with the chance to learn and practice in multiple clinical settings at some of the best teaching hospitals in the region and the country. Affiliated teaching hospitals are viewed as an extension of our research expertise. Our teaching hospitals provide a broad range of primary, secondary and tertiary medical and surgical services to the patients in more than 40 medical and surgical specialties and sub-specialties.

Our teaching hospitals are recognized for their outstanding clinical care and commitment to the academic excellence.

All hospitals are equipped with modern facilities to train students at a high scientific and professional level. In particular, all types of modern diagnostic and treatment are widely used.

List of Affiliated Hospitals

HIV-AIDS prevention Centre

General Medicine MD Program

Medical faculty Osh State University offers English medium general medicine MD program for foreign students, an affordable tuition fee and high quality of education make it the most favourite university of Central Asia as well as CIS states.

Hundreds of foreign students have graduated from Osh state university over the past two decades, now registered with medical councils in their countries and are working on important positions in their fields. Teachers are highly qualified and very experienced. Many of them are Candidate of Medical Sciences or Doctor of Medical Sciences (PhD).

Many outstanding scientists worked at Medical faculty, Osh state university and contributed much to the rapid development of the Medical faculty as a powerful scientific medical and educational center in southern Kyrgyzstan.

At present the physicians with Osh State University degrees are working in different countries of Asia, Africa, European Union and America. It shows wide recognition of Our English medium General Medicine MD program all over the world.

Having an MD degree often sets your course in life. For Five years you'll be trained extensively in medical subjects. You'll exhibit professionalism and leadership skills, interact with patients, and directly deliver care even before you graduate. A lot goes into being a doctor, but you know that, and you're ready for the challenge to start. Possibly, you've been ready for this your whole life.

As a doctor, you'll be an important part of people's lives during good times and bad. Their expert, their ally, and their translator at every major point in the human experience. Relieving pain and making the world a better place is why you're here, to learn about your options for medical institute and decide when (and where) to take the leap.

It's a rapidly changing world for doctors, and we're at the forefront, leading the leaders of tomorrow. We look forward to sharing our passion for the work that we do, and helping you realize your dream of becoming a physician.

At the International Medical Faculty OshSU we want students with a curious mind to drive to know more who are ready to practice medicine and devote their lives to service, care, research, and leadership. Our graduates go on to do incredible things. Our dedicated faculty and education staff work tirelessly to engage with students one-on-one to prepare them for the state of medicine today.

Basic Medical Sciences

The first year begins with the Core Principles of the Biomedical Sciences. The goal of the Core is to introduce the fundamental principles and vocabulary for each of the sciences basic to the practice of medicine. This is not the entire course time for these scientific disciplines as each discipline has an important role in the integrated organ systems modules. The discipline coordinator for each of the basic sciences in the Core have worked with faculty to integrate the core concepts in their organ modules.

The second half of the first year and the second year are organized into integrated organ systems and modules. The organ system modules feature integrated teaching of basic molecular, cellular, and organ systems processes in conjunction with mechanisms of disease. Sophisticated scientific information is introduced in a clinical context, illustrating its clinical relevance, and enhancing the students' learning. Each module begins with a brief review of micro and gross structure and progresses through physiology, pathophysiology, radiology, pathology, and pharmacology of disorders of the subject organ system. The learning methodologies include group discussions, demonstrations, workshops, self-study, and lectures.

After completing the first two years curriculum, student will have an easily retrievable, multidisciplinary corpus of biomedical knowledge about the organization, function, and systems of the human body in health; a "beginners" ability to integrate, synthesize, apply, and communicate that knowledge in clinical contexts; and the capability to retrieve this knowledge accurately and systematically, apply it appropriately in understanding both normal and abnormal human biological processes, and demonstrate the ability to think critically about these processes and the problems of patients.

Basic Medical Sciences

The study of medicine is a powerful integration of science, technologies, experience, and experiment that enables its students to alleviate human pain and suffering wherever in the world it may occur. At its finest, it is a quest to improve the human condition.

By eliminating unnecessary redundancies in educational material, and by more fully integrating topics in Basic medical sciences, Hospital practicals are now able to start even from first year. This has the advantage of providing students more flexibility and diversity in subsequent educational activities, thereby giving them opportunities to explore different clinical areas. Teaching activities in all years involve lectures, small-group sessions, team-based learning, simulations, laboratories, and clinical activities. Ultimately, we strive to create the best clinicians and physician-scientists, professionals whose knowledge, compassion, and leadership will serve as examples of excellence both to peers and patients alike. Implicit in this goal is a desire to ensure that our students will enthusiastically embrace these opportunities for growth to become true lifelong learners.

BLOOD STREAM

Clinical Sciences

The Clinical Sciences part of our curriculum is designed to give students a broad spectrum of medical practice, training in clinical skills, and patient contact. All the Government sector hospitals, clinics and medical centers of Osh city are affiliated with International Medical Faculty OshSU.

All student clinical experiences will be conducted by a team of experienced physicians and surgeons, having decades of both medical practice and teaching experience. Students will be assigned to physicians in actual patient care settings at several hospitals, clinics, and health centers in Osh city. The opportunity to work beside renowned physicians and surgeons is designed to build student clinical capabilities, increase student confidence.

Under the close supervision of clinical faculty, clinical students will learn to work as a team, analyze lab data, experience a physician's typical day, diagnose patient cases, conduct physicals, and perform procedures in wards, such as stitching, blood work, and vaccinations, assist in labor room, Surgery and Pediatric surgery operation theatres.

Highest patient-to-student ratio anywhere

More than 10 Affiliated hospitals / clinics / Medical centres

More Clinical practice and ward rotations

Research

Advances in medicine and science are the results of new ideas and approaches developed through research. At International Medical Faculty OshSU, we're driven to discover. Our research serves as an economic engine that drives Kyrgyz Republic's health industry. We develop new health technologies, strategies. And we collaborate with biomedical companies and health ministry to implement these health strategies in hospitals of the Kyrgyz Republic, Central Asia and the Eurasian region.

Training Scientists of the future

Clinical Trials

Most importantly, we are finding better and faster ways to translate our laboratory research into clinical trials for patients the only path to new treatments and cures.

Improving Healthcare

from understanding the rising costs of health care to developing delivery systems to under served populations. Our research focuses on improving Healthcare system.

Resources

Our researchers have substantial support: state-of-the-art facilities, extensive opportunities, a collaborative work environment, and outstanding research support services.

International Relations

Osh State University has a diverse profile of international activities in both research and education. International Medical faculty, Osh state university stays in contact with many medical institutions of the world. Scientists and students of the International Medical Faculty, Osh State University actively take part in International seminars, conferences and joint research with scientists of other universities. Our students go to partner universities in seminars and joint courses conducted by partner universities every year. International Medical faculty OshSU has agreements of mutual cooperation with many institutions around the world.

Student Life

Life at Osh is something for everyone. Students are actively engaged in a broad array of academic, cultural, social, and political organizations. Write for the University news publication, work with university leaders through student government, make your debut with visual and performing arts groups, and lend a hand in community service. Osh offers a student life that can be tailored to your own tastes. It's easy to immerse yourself in exciting opportunities and experiences both at University and across the city.

You'll find a vast number of ways to enjoy yourself, keep busy and make friends on campus. When you find time, You can go to walk across the city, on Suleiman too hilltop, watch movie and party at restaurants.

International Medical Faculty OshSU is a world-class leader in medical education, research, and patient care. As a student here, you'll receive a dynamic education with real-world experience that will empower you to succeed in today's competitive medical field.

Accommodation

There are several options available in accommodation including Government hostels, Private hostels, Private apartments. They differ in facilities and rental fee. Students can select according to their life style and budget. All the hostels are centrally located in the city and shopping markets, Banks, Medical clinics are on walking distance. Hostels are equiped with central heating system in winter. 2-4 persons share a room according to the room size. There is a separate section for girls and hostels are guarded by security personnel. Hostels have a common room, Dinning room. Another option is reting an apartment in the city. Apartments are costly than living in hostel.

Food

We have a special arrangement of food for foreign students and catering to student needs through its mess/ canteen.

Indian vegetarian / Non-vegetarian food is available in administration managed private hostel. Delicious and hygenic authentic Indian Food is served three times a day, freshly cooked by Indian cooks. There is a choice of North vs South Indian cousine.

Students representatives decide menu on weekly basis. There are several Cafe / Restaurants in the city serving Turkish, Fast food, Indian and local Ferghana valley cousine. Canteen / Cafeteria on University campus also caters to the students with Snacks, Coffee etc.

Welcome to Osh

Osh has been a student city, a centre of education, science and technology for the last one thousand years. Osh, a mountainous city located in heart of the historically famous Ferghana valley. Second largest city in Kyrgyzstan. Osh, is administrative centre of the southern Kyrgyzstan, Southern capital of Kyrgyzstan and capital of the Osh region.

There are a lot of places for refreshment activities, a sports stadium, sports centres, swimming pools, billiard clubs, winter sports centre with skiing tracks and other winter sports, a number of cinemas with latest English, Russian and Indian movies. Spare time can be spent in restaurants, drama theatres. concerts of famous Russian and Kyrgyz singers are often held at concert halls of the city. There are a lot of café, restaurants in the city, with fast food, Italian, Russian, uzbek, Chinese, Pakistani and Indian cousine. As Osh is a mountainous city, a hill station, summers are very beautiful. People come from other cities to Osh to spend their vacations and enjoy the beauty of nature. Weather in Osh is continental with temperature in summer ranges from +15 C to +30 C and in winter ranges from 5 C to +15 C. There are the boulevards and parks with lots of trees.

Osh is definitely a city where you could walk around for hours, just to get to know the culture and try to feel it yourself. Reputedly three thousand years old, Osh is one of the oldest city in Central Asia. In the middle ages Osh was a point of intersection for commerce from India and China to Europe. One of the branches of a Great Silk Way the Major Trade of an old age passed through the city connecting East with West.

The city has several monuments, including one to the southern Kyrgyz "queen" Kurmanjan Datka and one of the few remaining statues of Lenin. Second largest mosque in the country and the 16th-century Rabat Abdul Khan Mosque can be found here. The only World Heritage Site in Kyrgyzstan, the Sulayman Mountain, offers a splendid view of Osh and its environs.

Kyrgyz Republic

Kyrgyzstan is a country in Central Asia, a landlocked country with mountainous terrain. It is bordered by Kazakhstan to the north, Uzbekistan to the west and southwest, Tajikistan to the southwest and China to the east. Major cities are Bishkek, Osh and Jalal-Abad.

Kyrgyzstan has been at the crossroads of several great civilizations as part of the Silk Road and other commercial and cultural routes.

Kyrgyzstan is a member of the Commonwealth of Independent States, the Eurasian Economic Union, the Collective Security Treaty Organization, the Shanghai Cooperation Organisation, the Organisation of Islamic Cooperation, the Turkic Council, the Türksoy community and the United Nations.

Geography

The mountainous region of the Tian Shan covers over 80% of the country (Kyrgyzstan is occasionally referred to as "the Switzerland of Central Asia", as a result), with the remainder made up of valleys and basins.

Issyk-Kul Lake, in the north-eastern Tian Shan is the largest lake in Kyrgyzstan and the second largest mountain lake in the world after Titicaca. The highest peaks are in the Kakshaal-Too range, forming the Chinese border. Peak Jengish Chokusu, at 7,439 m (24,406 ft), is the highest point and is considered by geologists to be the northernmost peak over 7,000 m (22,966 ft) in the world.

Kyrgyzstan has significant deposits of metals including gold and rare-earth metals. Due to the country's predominantly mountainous terrain, less than 8% of the land is cultivated, and this is concentrated in the northern lowlands and the fringes of the Fergana Valley.

Tourism

One of the most popular tourist destination points in Kyrgyzstan are the lake Issyk-Kul and Osh region. Numerous hotels, resorts and boarding houses are located along northern shore of the Issyk Kul. The most popular beach zones are in the city of Cholpon-Ata and the settlements nearby, such as Kara-Oi (Dolinka), Bosteri and Korumdy.

Some of the most popular locations for camping are southern Osh, the area between Naryn City and the Torugart pass, and the mountains and glaciers surrounding Karakol in Issyk-Kul. Kyrgyzstan is popular for its skiing resorts and winter sports.

Admissions

Thank you for your interest in our program and for taking this first important step in your journey to becoming a doctor.

Osh State University maintains an open door admissions policy and constantly strives to provide programs beneficial for students. Applicants are considered for admission without regard to race, religion or national origin. Osh State University welcomes applications from foreign students.
